Codewell-dev

Full Stack Developer · React & Next.js · Node.js · MERN Stack

codewelldev@proton.me | https://codewell-dev-portfolio.vercel.app | github.com/codewell-dev | Ukraine · Remote · EU/PL

PROFESSIONAL SUMMARY

Full Stack Developer with 3.5+ years of commercial experience delivering production-ready web applications for clients across Europe and Ukraine. I build fast, maintainable software end-to-end — from pixel-perfect React interfaces to Node.js APIs and containerised deployments. My work spans e-commerce platforms, CRM systems, business dashboards, and custom SaaS tools.

Available for freelance contracts, long-term remote positions, and project-based work. 24–48h response time. Based in Ukraine, open to EU clients.

TECHNICAL SKILLS

Frontend	React.js · Next.js · TypeScript · JavaScript (ES2023) · Tailwind CSS · Material-UI · Framer Motion
Backend	Node.js · Express.js · NestJS · REST API · JWT · OAuth
Databases	PostgreSQL · MySQL · MongoDB · Firebase · Prisma
DevOps	Docker · Docker Compose · CI/CD · GitHub Actions · Vercel · Netlify · Linux
Tools	Git · Figma · Postman · VS Code · Jira
Infra	Hyper-V · VMware · HTTP/TCP/DNS · Basic server administration

PROFESSIONAL EXPERIENCE

Full Stack Developer — Freelance

2023 – Present

codewell-dev · Remote · EU & Ukraine clients

- Built 5+ production web applications from scratch including e-commerce platforms, CRM systems, and business dashboards — delivered on time and within budget
- Developed full-stack MERN applications with React, Next.js, Node.js, and MongoDB — handling both frontend UI and backend API design
- Achieved 90+ Lighthouse scores on all client sites through code splitting, lazy loading, and Next.js optimisation
- Implemented multilingual sites (EN/PL/UK) with custom i18n, hreflang, and JSON-LD structured data for EU SEO
- Containerised and deployed applications using Docker, Vercel, and Netlify — zero downtime on production launches

- Maintained 24–48h response time and regular milestone updates — 10+ five-star client reviews

Full Stack Developer
2021 – 2023

Norrspark · Poland · Remote

Frontend-focused full-stack role at a Polish remote-first company

- Developed and maintained internal dashboards and business tools for a Polish tech company using React.js, Next.js, and the MERN stack
- Built responsive, accessible user interfaces with Tailwind CSS and Material-UI — working from Figma designs to production
- Integrated third-party APIs and backend services; collaborated with a cross-functional team using Git and Jira
- Improved frontend performance by refactoring legacy components — reduced initial load time by 30%
- Delivered features across the full stack: REST APIs with Node.js, MongoDB data models, and React UI

KEY PROJECTS

Pizza House — Food Ordering Platform
pizzahouse.ua ↗

React · Next.js · NestJS · MongoDB · Material-UI

- Built a full-featured food ordering platform with product catalog, real-time cart, and order management
- Developed REST API with NestJS and MongoDB — handles live customer orders in production
- Mobile-first responsive design, admin panel for order tracking, integrated payment flow

codewell-dev Portfolio — Personal Site
codewell-dev.com ↗

Next.js · TypeScript · Tailwind CSS · Framer Motion

- Multilingual portfolio site (EN/PL/UK) with browser language auto-detection
- Full SEO stack: JSON-LD (Organization + WebSite + Review schemas), Open Graph, hreflang, llms.txt
- 95+ Lighthouse score — static export, optimised fonts, staggered Framer Motion animations

EDUCATION

Bachelor's Degree — Computer Engineering
2016 – 2021

Faculty of Information Technologies

ADDITIONAL

- Languages: Ukrainian (native), English (professional — B1)
- Virtualisation: Hyper-V, VMware, Horizon, System Center — server setup and basic administration
- Infrastructure: network configuration, DNS/HTTP/TCP troubleshooting, Linux server management
- Open to: full-time remote, long-term contracts, and short-term project-based work across EU
